

PROBATION AND COMMUNITY INTERVENTION

The purpose of the Probation and Community Intervention (PCI) services is to provide effective probation, diversion and post commitment services to reduce the need for commitment programs and to decrease the likelihood of repeat offenders victimizing the public. These programs provide supervision over youth to protect public safety, promote offender accountability through restorative sanctions and treatments, and to support youth in becoming responsible citizens.

| ■■■■■■■■■■■■■■■■■■■■■■ |

In FY 2006-07, Probation and Community Intervention programs served more than 76,000 youth. Nearly 30,000 youth completed these services the previous year.

Probation and Community Intervention provides case management services for the over 90,000 youth referred for delinquency each year and may be considered the most far reaching service area in the agency. The principle programming for this service area includes diversion, probation supervision, day treatment programs, and post commitment programs for youth on conditional release and/or probation status.

| ■■■■■■■■■■■■■■■■■■■■■■ |

Diversion is targeted towards the early and less serious offenders and includes low-cost programs that administer sanctions and treatments designed to keep offenders out of the judicial system. These services can range from programs such as Teen Courts, mediation services, and JASP, to more intensive services like Intensive Delinquency Diversion Services (IDDS).

Intensive Delinquency Diversion Services (IDDS) is an alternative to formal court involvement and supervision for youth with minimal criminal histories determined to be at high risk of becoming chronic offenders. IDDS services are provided through a competitively procured private service provider in each of the State's judicial circuits. The stated goals of IDDS include protecting the public, reducing recidivism and increasing responsible behavior. These programs are designed for youth who have been identified as most at-risk for becoming serious or chronic offenders. Assessment of risk is based on the presence of at least three of the four risk factors identified in *The 8% Solution: Preventing Serious Repeat Juvenile Crime*. These factors include school behavior and performance problems; family problems; substance abuse issues, including any regular use of alcohol or drugs; and pre-delinquent behaviors, such as running away.

IDDS programs provide intensive case management services to high-risk youth and their families. The contract with DJJ requires that services be provided six days per week and include services outside the normal 8 a.m. to 5 p.m. workday to ensure that youth and families have adequate access. Case management services include the following components:

- Treatment plan supervision
- Diagnostic evaluation services
- Social and life skill enhancement
- Substance abuse counseling
- Pre-vocational services
- Restitution
- Behavior management
- Mental health services
- Counseling services
- Community services
- Academic assistance
- Transportation

PROBATION AND COMMUNITY INTERVENTION

An integral part of program service delivery is the establishment of appropriate linkages with local resources that can provide services at a reduced cost. The length of participation is designed to be between five and seven months. Release from the program is based on the youth's performance in the program and an assessment of the potential for re-offending.

Probation Supervision programs are individualized court-ordered programs in which the youth are restricted to home or another designated placement in lieu of commitment to the Department. Juvenile probation officers (JPO) supervise youth to ensure compliance with court ordered sanctions, such as restitution, community service or curfew.

The JPO has two principle functions, intake services for youth who are referred for delinquency and supervision and case management during the various phases of a youth's involvement with the Department. Intake services begin when the youth is brought to the JPO for a criminal history records search, screening for detention placement, a suicide risk assessment, a risk and needs assessment, and a mental health and substance abuse screening. After this initial contact with the youth, the JPO must interview the parents, the arresting officer and other parties in order to make a recommendation to the state attorney regarding whether to file a petition for court processing. The JPO has supervisory responsibility for those youth who are delinquent but because of the lower risk they pose to public safety are placed on probation rather than in a residential program.

Youth placed in residential commitment programs are assigned a JPO who develops a plan for transitioning the youth back into the community. In cases of long-term placements, the JPO has the responsibility of tracking the youth's progress to keep the court informed, to keep in touch with the family and to communicate with the victim.

For both probation and committed youth, a supervision plan is developed that describes what the youth must do to earn a recommendation for termination from supervision. The plan is based upon court-ordered sanctions and the needs of the youth and may also involve restitution to the victim and community service work. Supervision involves on-site contact with the youth at home, school or other venues. Contact must be maintained with family, school, school resource officers, law enforcement, and treatment programs to monitor behavior and compliance with court ordered sanctions. Youth on probation supervision may be placed in day treatment programs designed for youth do not require services in a residential setting. Program groups in day treatment include vocational programs, marine programs, juvenile justice alternative schools, training and rehabilitation programs, and gender specific programs.

The Positive Achievement Change Tool (PACT) is used by the JPO to assess a youth's needs and risk to public safety. The most appropriate level of probation supervision is determined based on risk factors statistically validated to predict risk to re-offend, including criminal history and the current offense. A reassessment instrument is completed every 90 days or sooner if a change in supervision is needed because of a new law violation or if the youth's degree of compliance changes. The frequency of communication with the youth is based on the score received on the instrument, the youth's compliance with court-ordered sanctions, and participation in treatment.

The duration of supervision as recommended by the Department is six months. Violations of probation include both new law violations and non-law or technical violations, such as chronic truancy or refusal to attend a day treatment program. The JPO may file an affidavit of violation of probation with the state attorney who will decide whether to petition for a hearing. The court approves final termination from probation.

Probation Day Treatment programs are facility based and target youth on probation who are in need of a higher level of supervision and services. Youth participate in day treatment supervision, programming and education. Juvenile probation officers or counselors monitor progress of the youth at home, school and work and compliance with court sanctions. In addition, individual, family and small group counseling may be provided. Additional programs were authorized after this reporting period. All day treatment programs are operated by providers under contract with the Department.

Post Commitment services are provided to youth released from residential commitment programs. These programs assist with transitioning youth back into their homes and communities. Types of services include contracted day treatment services, contracted community supervision services, state-operated community supervision services, and residential vocational training. Youth can either be placed on a conditional release or post-commitment probation status.

Day treatment programs for youth on conditional release are similar to those serving youth at the front end of the system. Activities include on-site educational services, counseling, recreation, and community service projects. Community supervision services involve a DJJ juvenile probation officer or a case manager from a contracted program monitoring the progress of youth at home, school or work and compliance with other sanctions (curfew, community service, and restitution). Although length of supervision varies widely, most programs are designed to last three to seven months.

Post-Commitment Probation (PCP) is a statutorily defined probationary status for juveniles released from the custody of the Department but over whom the juvenile court has retained jurisdiction. Similar to probation, the objectives of PCP are to monitor behavior, direct juveniles to community services appropriate to their needs, and aid juveniles in recognizing alternatives to crime. The court must approve termination of PCP. There are some post commitment residential programs listed in this report. These programs were contracted through PCI to provide additional services post release from a residential commitment program.

Redirection was established by the state of Florida's Legislature and Department of Juvenile Justice to utilize community-based alternatives to traditional long-term residential commitment for Florida's youth. The Department established Redirection to create a less expensive, more effective sanction for delinquent youth. Currently, the two programs available through this project are Functional Family Therapy (FFT), Multisystemic Therapy (MST). In the next year Redirection plans on adopting Brief Strategic Family Therapy (BSFT) as well. Redirection is currently offered statewide with the exceptions of circuits 3 and 16. The Department of Juvenile Justice and Evidence-Based Associates (EBA), through local and judiciary input, established protocols for the program. Youth who would have received residential commitment may instead be referred to a Redirection program. The Redirection project offers an alternative resource option that can be used by juvenile probation officers as a sanction for lack of compliance with a treatment plan.

Multisystemic Family Therapy (MST) services consist of intensive family- and community-based treatment that addresses the multiple determinants of serious antisocial behavior in juvenile offenders. The multisystemic approach views individuals as being nested within a complex network of interconnected systems that encompass individual, family, and extra-familial (peer, school, neighborhood) factors. Intervention may be necessary in any one or a combination of these systems. MST targets chronic or substance abusing juvenile offenders at high risk of out-of-home placement and their families. The major goal of MST shall be to empower parents with the skills and resources needed to independently address the difficulties that arise in raising teenagers and to empower youth to cope with family, peer, school, and neighborhood problems. MST is offered as part of Redirection and as a stand alone program in circuits 1, 4 and 8.

Functional Family Therapy (FFT) is an empirically grounded and well documented family intervention program for dysfunctional youth. FFT is applied to a wide range of problem youth and their families in various multi-ethnic, multicultural contexts. Intervention ranges, on average, from 8 to 12 one-hour sessions for mild cases and up to 30 sessions of direct service for more difficult situations, with sessions are spread over a 3-month period. FFT is conducted both in clinical settings as an outpatient therapy and as a home-based model. FFT is offered as part of Redirection and as a stand alone program in circuits 3 and 18.

Brief Strategic Family Therapy (BSFT) is an intervention service for at risk youth and those who abuse substances or are delinquent. BSFT has two identified goals: 1) improve familial relationships that evolve from behavior problems presented by a youth, 2) improve familial relationships between groups (peers, school, etc.) that impact the behavior of the youth. Brief Strategic Family Therapy also addresses conflict that may be caused by differences in cultural norms and values. During the period of study for youth in this report, BSFT is available in circuits 9 and 16.

PROBATION AND COMMUNITY INTERVENTION

Profile of Youth

The following tables provide demographic data taken from the Department's Juvenile Justice Information System (JJIS). Profile data are based on the number of youth, unduplicated, who were provided services offered by the Probation and Community Intervention services during FY 2006-07.

Diversion Services						
	AGE					Youth Served
	0-7	8 - 11	12 - 14	15 - 17	18+	
	Statewide	22	1,432	10,079	14,851

Statewide	1,600	1,150	23	685	398	5	3,861
Percentage	41%	30%	1%	18%	10%	0%	100%

■■■■■■■■■■■■■■■■■■■■
In FY 2006-07, Probation and Community Intervention served over 30,000 youth through Diversion, services. An additional 40,000 youth were served through Probation services and 3,500 youth through contracted Day Treatment and Redirection services.
 ■■■■■■■■■■■■■■■■■■■■

PROBATION AND COMMUNITY INTERVENTION

Most of the youth served by Probation and Community Intervention were white males in the ages of 15 through 17 years old. Higher percentages of females received Diversion services (37% respectively). While higher percentages of black youth who were not in a post commitment program received Day Treatment services (53% respectively).

Probation Services

	AGE					Youth Served

Program Evaluation

Juvenile Probation and Community Intervention programs are evaluated using the Department's quality assurance process following a set of standards developed for these program types. Standards are based on the criteria set by national standards, state policy, and Florida Statutes. Program profile summaries, outcomes, and accountability measures are based on the number of youth who completed a program in FY 2005-06.

Quality Assurance Performance

The following table provides a listing, by name and provider, of all Probation and Community Intervention programs placed on Conditional Status in 2007.

Probation and Community Intervention Programs on Conditional Status in 2007

Name	Provider	Program Type
Boley Young Adult Program	Boley Centers for Behavioral Health Care, Inc.	Day Treatment
Eckerd Leadership Program	Eckerd Youth Alternatives, Inc.	Day Treatment
Emerald Coast Marine Institute ¹	Associated Marine Institute	Day Treatment
Florida Ocean Science Institute	Associated Marine Institute	Day Treatment
Gulf Coast Marine Institute - North	Associated Marine Institute	Day Treatment
Jacksonville Marine Institute	Associated Marine Institute	Day Treatment
Orlando Marine Institute	Associated Marine Institute	Day Treatment
Pinellas Marine Institute	Associated Marine Institute	Day Treatment
Rainwater Center for Girls	Crosswinds Youth Services, Inc.	Day Treatment
Tallahassee Marine Institute ¹	Associated Marine Institute	Day Treatment
Tampa Marine Institute	Associated Marine Institute	Day Treatment

¹ Programs placed on conditional status at the time of the review; however, corrective action was taken and the program has since been removed from conditional status.

When any program fails their initial quality assurance review (scores below 60% overall), a corrective action plan is required to be submitted to the program area Regional Director's office for review and approval. Once approved, staff from the program area (residential, detention, probation, etc.) may work with the program staff on the implementation of the corrective action plan and monitor the program to ensure the plan is having the desired effect. The Bureau of Quality Assurance schedules a second unannounced review for within six months of publishing the initial report. According to s. 985.632 (5)(f), if the program again fails to meet at least minimum thresholds of performance, the provider is subject to losing the contract for the program. If the program is state operated. Similar serious action must be taken and reported to the Governor and legislature. The following table provides a listing, by name and provider, of all Probation and Community Intervention programs failed their QA review in 2007.

Probation and Community Intervention Programs Which Failed the QA Review in 2007

Name	Provider	Program Type
Intensive Delinquency Diversion Services (IDDS) Circuit 1	University of West Florida	IDDS
Intensive Delinquency Diversion Services (IDDS) Circuit 14	University of West Florida	IDDS
Gainesville Wilderness Institute	Associated Marine Institute	Day Treatment
JESCA Day Treatment South	James E. Scott Community Association	Day Treatment

Outcome Evaluation Performance

Program outputs and outcomes, including total releases, the percentage of youth adjudicated for offenses committed during supervision (ODS), number of completions and completion rates, demographic characteristics, average length of stay, and recidivism rates, are presented in the following tables for each Probation and Community Intervention (PCI) program that released youth in FY 2005-06. Summary data are presented by individual program organized by program type.

PROBATION AND COMMUNITY INTERVENTION

During FY 2005-06, there were a total of 40,567 releases and 29,028 completions from the PCI program areas:

Program Area	Total Releases	Completions	% ODS	% Recidivism
Diversion Services	4,051	3,554 (88%)	NA	15%
Intensive Delinquency Diversion Services	2,327	1,640 (70%)	12%	15%
Probation Services	25,623	18,152 (71%)	32%	19%
Day Treatment and Minimum Risk Commitment Programs	1,424	616 (43%)	38%	26%
Redirection Programs	371	204 (55%)	29%	33%
Post-Commitment Services - Provider Operated	4,816	3,538 (73%)	18%	33%
Post-Commitment Services - State Operated	1,869	1,281 (69%)	28%	28%
Post-Commitment Services - Residential Programs	86	43 (50%)	14%	33%

The rate of offenses during supervision ranged from a high of 38% of the releases from Day Treatment and Minimum-Risk Commitment to a low of 12% from IDDS. Completion rates varied from a high of 88% for Diversion services to a low of 43% from Day Treatment and Minimum-Risk Commitment programs.

The majority of youth who completed PCI programs during the year were male (74%), white (61%) and non-Hispanic (86%). The average age at admission was 16.1 years. In comparing program areas, Diversion services had the highest percentage of females (32%) and Redirection programs had the highest percentage of black youth (62%) among those who completed the programs. The average age at admission increased along the continuum of services from Diversion (15 years), to probation (16 years) to post commitment (17 years).

Given that the PCI program areas serve a wide variety of youth, ranging from youth with no prior offense history to youth who have been committed, the substantial differences in the average prior seriousness indices observed across the program areas are as expected. Youth completing IDDS and other diversion programs had the least serious delinquency histories; while youth who were previously committed completing post commitment services had the most serious delinquency histories. Youth completing intensive programs such as Day Treatment and Redirection had more serious histories than youth completing general probation.

Recidivism rates for Probation and Community Intervention programs varied by program area from a high of 33% for Redirection and provider operated and residential post commitment services, to a low of 15% for IDDS and Diversion services. Probation supervision had a lower rate of recidivism (19%) than Day Treatment (26%) or Redirection (33%) and youth completing state operated post commitment services had fewer recidivists than those completing provider operated (28% and 33% respectively). Redirections had a lower recidivism either Low-Risk or Moderate-Risk Commitment (33% and 39% respectively).

¹ ODS is the percent of releases adjudicated for an offense during supervision.

² These programs have closed, changed providers, or had a structural programmatic change since the time period of the evaluation.

³ These programs were probation enhancement services that were services provided in addition to traditional monitoring and supervision.

⁴ Italics indicate the program completed less than 15 youth and care should be taken in interpreting this data.

¹ ODS is the percent of releases adjudicated for an offense during supervision.

² These programs have closed, changed providers, or had a structural programmatic change since the time period of the evaluation.

³ These programs were probation enhancement services that were services provided in addition to traditional monitoring and supervision.

⁴ Italics indicate the program completed less than 15 youth and care should be taken in interpreting this data.
