Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The Marion Youth Academy is a 48-bed staff-secure facility for male juvenile offenders, ages 13-18 years old and is located in Ocala, Florida. The program is operated by Sequel Youth and Family Services through a contract with the Florida Department of Juvenile Justice (FDJJ). The facility was managed by a different contractor during its initial PREA audit in March 2015. This current audit of the facility was assigned to the Auditor through the Correctional Management and Communications Group, LLC located in Minneola, Florida and no conflict of interest exists.

A conference call was completed with facility staff and the Florida Department of Juvenile Justice statewide PREA Coordinator in preparation for the onsite portion of this audit. The conference call included general introductions; overview of PREA audit; review of documentation needed; and provision of information regarding the facility comprehensive tour and the resident and staff interviews. Additionally, facility staff was given the opportunity to ask questions regarding the site visit process and any other portion of the PREA audit. The Assistant Facility Administrator serves as the PREA Compliance Manager.

Printed signs announcing the audit and the Auditor's contact information were provided to the FDJJ PREA Coordinator who subsequently provided the signs to the facility's Executive Director. Signs were posted in conspicuous places accessible to residents, staff and visitors. Pictures of the posted notices were taken, areas were identified, and the pictures were sent to the Auditor via email.

The PREA Pre-Audit Questionnaire, policies, and supporting documentation were uploaded to a flash drive and mailed to the Auditor. After an assessment of the information provided, a written review was sent to the Executive Director and the PREA Compliance Manager, requesting additional documents and clarification of information. There was communication during the document review process with the Executive Director and the Assistant Facility Administrator/PREA Compliance Manager prior to the site visit. Additional documentation was requested by the Auditor and was provided by facility staff prior to the site visit and identified documentation was available on site.

The site visit was conducted February 4-5, 2018. A comprehensive tour of the facility was conducted by the Assistant Facility Administrator/PREA Compliance Manager, Administrative Assistant, and Training Development Coordinator. The comprehensive tour included all areas of the facility and outside grounds. The printed notifications of the PREA site visit were observed not posted in the areas previously identified with the pictures sent earlier to the Auditor. The staff explained the signs had recently been torn down by residents. The signs were printed and posted and the Auditor advised the Executive Director, Assistant Facility Administrator and Administrative Assistant that the signs should remain posted for at least two weeks after the site visit to ensure it is seen by all residents and was posted for at least six weeks. The staff estimated the time period for the missing signs to be approximately a week.

During the comprehensive tour of the facility, posted signs were also observed regarding general PREA information and contact numbers for reporting sexual abuse or sexual harassment. Residents were observed interacting with staff under staff's direct supervision during dinner time, leisure activities, and education activities in the classrooms.

A total of 10 residents were interviewed and were randomly selected by reviewing the population roster with the goal of selecting a diverse group of residents, including targeted interviewees with various admission dates. Twelve direct care or random staff members were interviewed from all shifts. Twelve specialized staff interviews were conducted including a contractor and volunteer. The interviews with staff members, residents, and contractor and volunteer revealed their receipt of PREA training which was also verified by a review of documentation.

Secondary documentation was reviewed onsite and included but was not limited to various forms; staff background checks; risk and other screening instruments; education and training acknowledgement forms; training records; logbooks; and other documentation. Upon completion of all interviews and the site visit process, a briefing was held with the Executive Director, Assistant Facility Administrator and Administrative Assistant and the timelines regarding the submission of PREA reports were discussed.

Facility Characteristics

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

The Marion Youth Academy is a non-secure residential facility for male juvenile offenders. An individualized treatment plan is developed for all residents to address goals established to intervene in the delinquent lifestyle, foster normal adolescent maturation, and prepare the resident for reintegration into the home and community. Additionally, the treatment plans address specific mental health needs and seek to integrate the family and other natural supports into the residents' treatment. The goal of the program is to encourage and enhance positive law-abiding behavior while providing the resident with the tools they will need for a successful future. The length of stay in the program is three to nine months, depending on the resident's pace of success in the completing his individualized treatment plan and goals.

Program services and activities include but are not limited to therapy and counseling groups; education services; vocational programming; medical services; physical education; and recreational activities. Academic and career education services are provided through the Marion County School District and include: GED preparation; course work in English; Mathematics; Science; Social Studies; and one elective course. The elective course is typically used to provide additional reading assistance to needy students or vocational training. Vocational opportunities include: Masonry Project; Habitat for Humanity; Food Handlers;

and Florida Ready to Work. The program also provides vocational training through the National Center for Construction Education and Research (NCCER) and the Junior Achievement Program. The program also serves as a GED test site.

The Clinical Director manages the provision of mental health and social services. This section consists of four Mental Health Therapists, Director of Case Management, and a Recreation Therapist. A psychiatrist visits the facility twice a month. Medical services are managed and coordinated by the Director of Nursing. The medical unit includes one full-time Registered Nurse and another Registered Nurse who works as needed. The physician, Designated Health Authority, visits the facility weekly. Services are also provided by the Florida Department of Health in Marion County.

The Director of Case Management supervises the case management unit which also includes five case managers. The case management staff collaborates with all disciplines regarding planning, facilitation and coordination of services in efforts to meet the comprehensive needs of the residents. Direct care staff members are responsible for the interactive supervision of the residents and manage the residents during their daily activities. The comprehensive tour of the facility and a subsequent walkthrough revealed the PREA staffing ratio was met and observations indicated direct supervision of residents is provided.

The program is primarily contained in one main building with the control room at the entrance of the building. The front of the building contains the lobby/reception area; offices; conference room; and a staff break room. Beyond the front section of the building is the area containing the kitchen; dining area; two dormitories (Phase I and Phase II); four classrooms; education testing room; library; medical clinic; conference room; and offices. Each dormitory contains a multipurpose room, an inside recreation area, and a laundry room. The facility has two observation or isolation rooms which are used for approximately 2-3 hours. The outside grounds contain ample space for recreation and other activities. Also located on the grounds is a small building utilized for career training in the building industry by Home Builders Institute.

The bathrooms used by the residents afford them a reasonable amount of privacy for changing clothes, using the toilet and showering. There are no surveillance cameras located in the bedrooms or bathrooms. Posted signs were observed requiring female staff to announce their presence when entering the dormitories. The residents interviewed stated female staff members announce their presence upon entering their dormitory. The practice of female staff announcing their presence was observed during the comprehensive tour of the facility as the group entered the Phase I and Phase II dormitories.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Facility Policies 5.23 and 5.01-Staffing and Youth Supervision and FDJJ 1919 collectively address staffing, supervision, monitoring, and unannounced rounds. The Policies outline the considerations for and provide guidance to staff in the aforementioned areas, including adhering to the required staffing ratios. The work schedules, staffing plan and observations during the comprehensive facility tour revealed the adherence to the staffing ratios.

The staffing plan provides for the PREA staffing ratios to be met and a hold-over system of direct care staff ensures adherence to the staffing plan. During the interview with the Executive Director and Assistant Facility Administrator/PREA Compliance Manager, the importance of the population type, security levels and other factors were identified as significant in ensuring the adherence to the required staff ratios.

The annual Staffing Plan Assessment was completed on June 14, 2017 by the FDJJ statewide PREA Coordinator in conjunction with the Assistant Facility Administrator and includes but is not limited to a review of the following: staffing plan; monitoring system; resources available and committed to ensure adherence to the staffing plan; and the occurrence of unannounced rounds. The form summarizes the review and was signed and dated by both parties.

The facility Policy and FDJJ 1919 provide for compliance to the staffing plan except during limited and exigent circumstances and the deviations be documented. According to the information reviewed, including the annual Staffing Plan Assessment, interviews with the Executive Director and the Assistant Facility Administrator, the facility complies with the PREA staffing ratios.

A review of a sample of documented unannounced rounds and the facility Policy and FDJJ 1919 support unannounced rounds are conducted by intermediate level and higher level staff. The unannounced rounds are conducted to identify and deter sexual abuse and sexual harassment. The Assistant Facility Administrator was interviewed regarding unannounced rounds and how he ensures staff members do not alert other staff members while the rounds are occurring.

Auditor Overall Compliance Determination

- Exceeds Standard** (*Substantially exceeds requirement of standards*)
- Meets Standard** (*Substantial compliance; complies in all material ways with the standard for the relevant review period*)
- Does Not Meet Standard** (*Requires Corrective Action*)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Facility Policy 5.23 addresses the type of searches to be conducted. Cross-gender strip and cross-gender visual body cavity searches are prohibited at the facility. Cross-gender pat-down searches are not permitted. The review of Policy and interviews conducted with direct care staff members, residents Assistant Facility Administrator, and Executive Director indicate cross-gender searches are not conducted. Staff interviews supported by documentation revealed staff's receipt of training regarding the searches of all residents in a safe and sensitive manner.

The facility reports cross-gender searches have not been conducted during this audit period. Staff members are prohibited from searching or physically examining a transgender or intersex resident for the sole purpose of determining the resident's genital status; this information was also verified through interviews with direct care staff. When the genital status of a resident is unknown, learning this

information would be part of a broader medical examination conducted by a medical practitioner in private.

The facility has developed written procedures providing guidance to staff and ensuring residents are able to shower, change clothes and perform bodily functions without being directly viewed by staff. Direct care staff and resident interviews confirmed the practices for residents being provided reasonable privacy as they perform bodily functions. Facility Policy, staff and resident interviews, and observations confirmed female staff members announce their presence upon entering the housing units.

Auditor Overall Compliance Determination

- Exceeds Standard** (*Substantially exceeds requirement of standards*)
- Meets Standard** (*Substantial compliance; complies in all material ways with the standard for the relevant review period*)
- Does Not Meet Standard** (*Requires Corrective Action*)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Facility Policies 2.01 Classification and 5.23, and FDJJ 1919 ensure all youth admitted to the facility are properly screened for various vulnerability risks. Staff and resident interviews and a review of documentation confirmed residents are screened for risk of victimization and abusiveness. This vulnerability screening occurs within 24 hours of intake, whether the youth is transferred from another facility or is a new admission.

The risk screening for victimization and abusiveness is conducted using the FDJJ objective instrument, Screening for Vulnerability, Victimization and Sexuality Aggressive Behavior (VSAB). The VSAB is used to obtain the information required by the standard, including but not limited to prior sexual victimization or abusiveness; the youth's self-identification; current charges and offense history; and intellectual or developmental disabilities.

Resident interviews, a review of documentation and the interview with a Case Manager explained how the VSAB is administered during the intake process. Information for completing the VSAB is also obtained by talking to parents/guardians and reviewing the court packet received from FDJJ prior to the

youth's arrival to the facility. Additional screening and assessment tools are used to obtain information to aid staff in meeting the individual needs of the residents.

The Case Manager indicated reassessments, using the VSAB instrument, are conducted when new information is obtained or there is an allegation of sexual abuse or sexual harassment. The completed VSAB instruments are accessible to the clinical staff.

Auditor Overall Compliance Determination

- Exceeds Standard** (*Substantially exceeds requirement of standards*)
- Meets Standard** (*Substantial compliance; complies in all material ways with the standard for the relevant review period*)
- Does Not Meet Standard** (*Requires Corrective Action*)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Facility Policy 5.23 and FDJJ 1919 address the use of the information from the VSAB. The information obtained through the administration of the screening instrument assists staff in determining bed, education and other program assignments with the goal of keeping all residents safe and meeting needs of each resident. Random staff interviews indicated protective measures would be taken immediately if it was determined a resident was at risk for imminent sexual abuse and responses included immediately separating residents and alerting other staff of the situation.

According to Policy and interview with the Case Manager, placing bisexual, transgender, or intersex residents in specific housing or making other assignments solely based on how the residents identify or their status, is prohibited. Staff members are prohibited from considering the identification as an indicator that these residents may be more likely to be sexually abusive.

Facility and agency policies and the interview support housing and program assignments for transgender or intersex residents would be made on a case-by-case basis to ensure the resident's health and safety. The Case Manager is aware of the Policies to be implemented when there are transgender or intersex residents within the population. The resident's concern for his own safety is currently taken into account through responses obtained from the administration of the VSAB and as confirmed through resident interviews and a review of a sample of VSABs.

- Does Not Meet Standard** (*Requires Corrective Action*)

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Facility Policy 5.23 and FDJJ 1919 provide multiple internal ways a resident may report, including how he can anonymously report sexual abuse and sexual harassment; retaliation for reporting; and staff neglect or violations of responsibilities that may have contributed to such. Residents may report allegations of sexual abuse or sexual harassment by telephone through the Florida abuse hotline. The resident handbook contains information for reporting allegations of sexual abuse and sexual harassment of residents.

Direct care staff interviews revealed residents and staff may use the abuse hotline to anonymously report sexual abuse and sexual harassment of residents. Internal ways a resident may report include completing a grievance form; talking to a staff member; completing a sick call form; a Let's Talk Request form; and third parties may report allegations of sexual abuse and sexual harassment. The residents and staff were aware third-party reports could be made and reports could be made anonymously. The Let's Talk Request form allows the resident to identify the staff member he would like to speak with and identify the general subject area.

Facility policies, FDJJ 1919 and the resident handbook provide a grievance form may be used to report allegations of sexual abuse or sexual harassment. The form may be completed and placed in the locked grievance box at any time. The grievance box is checked daily for grievance and Let's Talk Request forms.

Access to writing tools is provided for residents so they are able to complete forms alleging sexual abuse or sexual harassment. Information about reporting allegations of sexual abuse and sexual harassment is contained in the resident handbook and is posted on the living units and other areas of the facility. Residents and staff members are aware of the methods a resident may report allegations of sexual abuse and sexual harassment, based on their interviews.

The residents interviewed stated they have contact with someone who does not work at the facility they could report abuse to if needed. Policies and staff interviews indicate staff members are required to immediately document all verbal reports. Staff members receive information on how to report allegations of sexual abuse and sexual harassment through policies and procedures, training, and staff meetings.

The residents are aware of how to use a grievance form to report a PREA related allegation however a review of the resident handbook revealed more clarity was needed regarding how a grievance form may be used to report an allegation of sexual abuse or sexual harassment and not to utilize the informal phase of the grievance process. The Assistant Facility Administrator/PREA Compliance Manager implemented a corrective action with a modification in the handbook language which makes it clearer to residents that the informal phase of the grievance system is not to be used when a grievance form is used to report an allegation.

(N/A if agency is exempt from this standard.) Yes No NA

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

When a grievance is received regarding sexual abuse or sexual harassment, it is immediately provided to the Executive Director/designee. The policies and procedures for reporting allegations of sexual abuse or sexual harassment are initiated and a report is made as required. The grievance system does not include a process for facility staff to investigate or resolve allegations of sexual abuse or sexual harassment. The content of the grievance is reported and an investigation may be conducted by the FDJJ Office of Inspector General; Florida Department of Children and Families; or local law enforcement when the allegation is criminal in nature.

The purpose of the submission of a PREA allegation on a grievance form provides residents another route for submitting and staff's receipt of written allegations and also provides management staff with an additional opportunity to protect the resident. There is a timely response from staff due to the grievance box being checked daily. The resident will be informed of receipt of the grievance and that it has been or will be referred for investigation.

Policy provides a resident may not be disciplined when it has been determined that a report alleging sexual abuse was made in good faith. Residents understand they will not be punished if a report is made in good faith, as determined through the interviews. The residents and staff interviewed identified the use of a grievance form as one of the methods that may be used to report allegations of sexual abuse or sexual harassment and the residents are aware of how grievances are handled regarding sexual abuse or sexual harassment. During the past 12 months, no allegations of sexual abuse or sexual harassment were received through a grievance.
