
Standardized Program Evaluation Protocol [SPEP] Report

Bartow Youth Academy

G4S Youth Services, LLC

(Contract Provider)

2145 Bob Phillips Road

Bartow, Florida 33830

Primary Service: Young Men's Work

SPEP Review Date(s): October 4-5 & 10-11, 2016

Florida Department of Juvenile Justice

Report Date(s): 6/8/2017

Introduction

The Standardized Program Evaluation Protocol (SPEP) is an assessment tool derived from meta-analytic research on the effectiveness of juvenile justice interventions. The tool is designed to compare existing intervention services, as implemented in the field, to the characteristics of the most effective intervention services found in the research.

The SPEP scoring system allows service providers to identify specific areas in which program improvements can be made to their existing Primary Services. These improvements can be expected to increase the effectiveness of those Primary Services in the reduction of recidivism for youth receiving the Primary Service. A separate SPEP evaluation is conducted, at the time of the program's Quality Improvement Review, for each Primary Service provided by the program.

This report provides two types of SPEP scores: a **Basic Score**, equivalent to the number of points received, and a **Program Optimization Score (POS)** that is equivalent to the maximum number of possible points that could be received based on the SPEP domains under the control of the program. The Basic Score compares the Primary Service being evaluated to other intervention services found in the research to be effective, regardless of service type. It is meant as a reference to the expected overall recidivism reduction when compared to other Primary Services of any Type.

A **Program Optimization Percentage (POP)** rate is derived from the Basic Score and Program Optimization Score. The POP rate is a percentage score that indicates where the rate of effectiveness of the Primary Service is when compared to its potential effectiveness if optimized to match the characteristics of similar Primary Services found to be most effective in the research. The POP rate is likely more meaningful to service providers as it represents how close the program's Primary Service is to its potential for that Primary Service Type. For example, a POP rate of 55% would indicate that the program's Primary Service is operating at 55% of its potential effectiveness for recidivism reduction that has been found for a similar Primary Service Type with research evidence of effectiveness.

Program Name: **Bartow Youth Academy**
Provider Name: **G4S Youth Services, LLC**
Location: **Polk** County / Circuit: **10**
Review Date(s): **October 4-5 & October 10-11, 2016**

MQI Program Code: **1268**
Contract Number: **R2118**
Number of Beds: **28**
Lead Reviewer Code: **132**

Observations During Review

☐ Group/Session of Primary Service(s)
☒ Program Activities
☒ Recreation
☒ Social Skill Modeling by Staff
☒ Staff Interactions with Youth
☒ Staff Supervision of Youth
☒ Transition/Exit Conferences
☒ Treatment Team Meetings

1. Primary Service and Supplemental Service Types

Basic Score: 30 Points
POS: 30 Points
POP: 100%

There are five Primary Service Types that have been classified into Groups with a maximum number of points possible for rating purposes. Some Primary Service Types may also have qualifying Supplemental Service Types that could earn a program an additional 5 points.

The Primary Service for this program is Young Men's Work. The program was awarded 25 points because the Primary Service is identified as a Group 4 Service. The specific Sub-Component Service Type identified is Group Counseling. The Primary Service was identified as this type of service as it focuses on psychological or interpersonal problems or issues faced by an individual and involves a group of youths interacting with each other.

An additional 5 points was awarded based on a Qualifying Supplemental Service. The Qualifying Supplemental Service was identified as None (automatic 5 points added to score), which was not demonstrated to have been implemented.

The Primary and Supplemental Service Raw Score is equal to the sum of the Primary Service points plus the Qualifying Supplemental Service points.

Note: Quality information is evaluated by the Bureau of Monitoring and Quality Improvement while on-site during the annual compliance review.

2. Overall Quality of Service Delivery Score	Basic Score: 20 Points POS: 20 Points POP: 100%
<i>The Quality of Service Delivery Score is the sum of the scores for the seven treatment quality indicators. The Program Optimization Percentage Rating determines the Overall Quality of Service Level: Indicator Sum Score 0-3 = Low; Sum Score 4-7 = Medium; Sum Score 8-10 = High.</i>	

Sum of all Indicator Scores (a – g below): 8 Points

Overall Quality of Service Delivery Level:

- ☐ Low (Raw Score = 5)
☐ Medium (Raw Score = 10)
☒ High (Raw Score = 20 Points)

a. Facilitator Training	Basic Score: 1 Point(s) Maximum Possible Score: 1 Point
<i>All facilitator(s) of the Primary Service must have received formal training specific to the intervention or model/protocol.</i>	

During the past year, the program had three therapists providing this primary service. There was documentation to support each therapist received facilitator train from a qualified trainer.

b. Treatment Manual/Protocol	Basic Score: 2 Point(s) Maximum Possible Score: 2 Points
<i>There is a specific written manual/protocol detailing delivery of the Primary Service.</i>	

The program uses the Young Men's Work curriculum which includes twenty-six lessons. The manual contains the order of lessons to be delivered, lessons plans for each session, implementation guidelines, and a scrip to be followed.

c. Observed Adherence to the Manual/Protocol	Basic Score: N/A Point(s) Maximum Possible Score: 1 Point
<i>Upon observation of the Primary Service by the Quality Improvement reviewer, the facilitator of that service adhered to the written protocol/manual.</i>	

This primary service was not offered during the times the annual compliance review team was on-site for the annual review, therefore this indicator rates as non-applicable.

d. Facilitator Turnover	Basic Score: 1 Point(s) Maximum Possible Score: 2 Points
<i>Measures the extent to which facilitators of the specific intervention/service have changed as well as gaps in service of that Primary Service.</i>	

Facilitation of the cohort beginning November 27, 2015 and ending on May 20, 2016 was primarily provided by one therapist. Another trained facilitator acted as a substitute when the primary facilitator was not available. The second cohort was initially provided by a single facilitator, however, another facilitator took over after receiving training in the curriculum. There was no documentation to support a transition between facilitators occurred.

The program can earn 2 points by minimizing facilitator turnover.

At the time of the review, the program did not meet criteria to earn a score of 2.

e. Internal Fidelity Monitoring	Basic Score: 2 Point(s) Maximum Possible Score: 2 Points
<i>The program has a process to monitor the delivery of the intervention to examine how closely actual implementation matches the model protocol.</i>	

The program has a process to ensure each facilitator of this primary service receives monthly fidelity monitoring to include adherence to the lesson plan, group size, population, frequency, needed materials, duration, and interventions. Reviewed documentation confirms fidelity monitoring of this primary service was conducted on a monthly basis. The individuals conducting the fidelity monitoring were training in the facilitation of this curriculum.

f. Corrective Action based on Fidelity Monitoring	Basic Score: 1 Point Maximum Possible Score: 1 Point
<i>The program has a process by which corrective action is applied and demonstrated based on the fidelity monitoring of the delinquency intervention/therapeutic service.</i>	

The program has a process to implement corrective action, as needed. Additional coaching and supervision will be documented and may be included in the weekly clinical supervision. Reviewed documentation confirms corrective action was not required for this primary service.

g. Evaluation of Facilitator Skill Delivering the Intervention	Basic Score: 1 Point Maximum Possible Score: 1 Point
<i>Performance evaluations of the facilitators of the specific intervention/service include evaluation of skill in delivering the intervention/service.</i>	

Two of three facilitators of this primary service were eligible for an annual performance evaluation. The evaluation specifically addressed the individual's proficiency in delivering the curriculum. One facilitator was eligible for a ninety-day probationary evaluation. The probationary appraisal did not evaluate the therapist's proficiency in delivering the intervention.

3. Amount of Service - Duration

Basic Score: 6 Points

Program Optimization Score: 10 Points

Program Optimization Percentage: 60%

Research indicates the target duration of 24 weeks for this type of service. Of the 19 youth in the sample, 63% (12 of 19) reached at least the indicated target duration. Further explanation is detailed in the Summary and Recommendations below.

Note: Dosage information (duration) is calculated from the Juvenile Justice Information System (JJIS) Evidence-Based Services module. Duration is included for the youth in the SPEP sample.

4. Amount of Service – Contact Hours

Basic Score: 0 Points

Program Optimization Score: 10 Points

Program Optimization Percentage: 0%

Research indicates a target of 40 contact hours for this type of service. Of the 19 youth in the sample, 5% (1 of 19) reached the indicated target contact hours. Further explanation is detailed in the Summary and Recommendations below.

Note: Dosage information (contact hours) is calculated from the Juvenile Justice Information System (JJIS) Evidence-Based Services module. Contact hours are included for the youth in the SPEP sample.

5. Risk Level of Youth Served:

Basic Score: 25 Points

Program Optimization Score: 25 Points

Program Optimization Percentage: 100%

Percentage of Youth with Moderate, Moderate-High, and High-Risk Levels to Reoffend: 95%

Moderate to High Score: 12 Points

Program Optimization Score: 12 Points

Program Optimization Percentage: 100%

Table 1		
Moderate	=	0 youth
Moderate-High	=	6 youth
High	=	12 youth
<u>Total Youth in Sample</u>	=	<u>19 youth</u>

Percentage of Youth with High-Risk Level to Reoffend: 63%

High Score: 13 Points

Program Optimization Score: 13 Points

Program Optimization Percentage: 100%

Table 2		
High	=	12 youth
Total Youth in Sample	=	19 youth

The risk level score is compiled by calculating the total percent of the SPEP sample that score Moderate to High-Risk to reoffend and also the total percent of the SPEP sample that score High-Risk to reoffend.

Of the SPEP sample, 95% (18 of 19) youth scored Moderate to High-Risk to reoffend, for a score of 12 points.

Of the SPEP sample, 63% (12 of 19) youth scored High-Risk to reoffend, for a score of 13 points.

Note: The latest Community Positive Achievement Change Tool (C-PACT) prior to the placement date was used in the derivation of the risk level score. This C-PACT provides the best indication of the risk to re-offend level of the youth when the youth was first placed in the program.

Summary and Recommendations

Category	Basic Score	Program Optimization Score	Program Optimization Percentage
Primary and Supplemental Service Type	30	30	100%
Quality of Service Delivery	20	20	100%
Amount of Service: Duration	6	10	60%
Amount of Service: Contact Hours	0	10	0%
Risk Level of Youth Served	25	25	100%
Totals	81	95	85%

This SPEP report evaluates Young Men's Work, an intervention delivered at Bartow Youth Academy.

The program scored High for Quality of Service Delivery. This score can be optimized by minimizing facilitator turnover.

The program earned 6 points for Amount of Service: Duration. Of the 19 total youth sampled, all included dosage with end dates in the EBS Module. Of those youth with correct dosage, 12 received at least the recommended weeks of service. Youth in the sample completed between 7 and 47 weeks of service, with an average of 26 weeks.

The program earned 0 points for Amount of Service: Contact Hours. Of the 19 total youth sampled, all included dosage in the EBS Module. Of those youth with correct dosage, 1 received

at least the recommended hours of service. Youth in the sample completed between 25 and 50 hours of service, with an average of 29 hours.

The program was awarded 25 available points for Risk Level of Youth Served. This is calculated using data from the Community - Positive Achievement Change Tool (C-PACT) assessment. This score reflects youths' most recent C-PACT score prior to placement at the program. The program itself has no control over youths' C-PACT risk level because the scored assessment was administered prior to the youths' admission.

RECOMMENDATION(S):

Bartow Youth Academy can optimize their SPEP Quality of Service Delivery score by minimizing facilitator turnover.

Bartow Youth Academy can optimize their SPEP Amount of Service score by ensuring that dosage for all youth is recorded accurately in EBS and by ensuring that youth receive the full targeted dosage of service.
